

The Hopper Plate

The hopper plate is an extra metal plate that can be inserted in the hopper on the operator's side as shown in the illustration below.

DUPLIMATE

The plate is mounted by default in the Duplimate and should be removed when the cards are taller than 88.5 mm.

BRIDGESORTER

The plate is not mounted by default in the BridgeSorters and should be inserted in its slot if the cards are shorter than 57.5 mm.

See video for instruction how to remove the plate
